March 8<sup>th</sup>, 2022

v. Maheriv

No. 15

To all German clinics and suppliers of  
medicines and medical devices

Good afternoon, dear partners and volunteers

The hospital administration expresses its respect to you. Due to the aggression of the Russian Federation since the February 24<sup>th</sup>, 2022, thousands of Ukrainians were left without housing, money, clothes, food and other basic things. One of the most important needs in the country during the armed aggression is to ensure the humanitarian needs for the citizens, to ensure the smooth functioning of medical institutions of the country, to provide medical care to wounded defenders and civilians of Ukraine. The humanitarian aid, which will be provided to the citizens most affected by the war with Russia, is needed to provide clothes and footwear, medical care, medicines and drugs; to meet food needs; to arrange accommodation for Ukrainian defenders, citizens and refugees who have left their place of residence in connection with the military actions; and to provide them with goods of prime necessity.

Taking the above-mentioned into account, we ask you to provide the following to the Municipal Non-profit Enterprise “Dobroshyn-Maheriv Primary Health Care Center”:
